EXPERIENCE

Smart Data Solutions

Developer

May 2020 - Present

Minneapolis, MN

- Ran point on on-boarding clients, integrating their domain models into ours and created automated reports, claim eligibility matching systems, data capture systems, data export systems, etc. as well as managing various EDI formats according to the clients needs.
- Added functionality to QuickClaim to allow for easier customer on-boarding into our ecosystem. Utilized Java, MySQL, Javascript and SCSS
- Took many projects on and balanced them effectively to allow my employer to take on more clients which increased the company's revenues significantly

Naturescape

Full Stack Developer

June 2018 - April 2020

Muskego, WI

- Oversaw Naturescape's external website
- Created, maintained, and deployed internal tools for Naturescape employees such as a time sheet system and an efficiency tracker which saved countless man hours. Utilized modern technology such as VueJS and NodeJS as well as C#.

Boucher Auto Group

IT Specialist

December 2017 - June 2018

Greenfield, WI

- Monitored and identified known hardware, software, and network errors/problems and provide support
- Responded to service desk tickets, telephone calls, emails, and requests for technical assistance
